**Sustainability**

## Sustainability Team

Northern Border University (NBU) demonstrates a commitment to sustainable development through various dedicated units and initiatives:

### 1. Scientific Chairs Unit

The Scientific Chairs Unit at NBU aligns with the university's strategic plan to contribute to sustainable development based on a knowledge economy, supporting the goals of Saudi Arabia's Vision 2030. This unit focuses on funding research projects, attracting international researchers, enhancing the scientific research system, promoting innovation, and applying research outcomes for societal benefit. Notably, it oversees chairs such as:

### 2. Department of Biology

The Department of Biology is actively involved in community service activities focused on environmental protection and biodiversity conservation. Their efforts aim to ensure the sustainable management of natural resources in the Northern Border Region, reflecting NBU's dedication to environmental sustainability.

### 3. Science and Technology Unit

This unit coordinates and manages programs related to the university's scientific, applied, and technological activities. It ensures these initiatives align with the long-term national plan for science and technology, contributing to sustainable development in line with Saudi Arabia's Vision 2030.
